

Defect Report 13

Issue location

- Edit information page

Issue details and actual behaviour

- When changing password page crashes (then logs me out upon refresh)

TypeError: decode is null

EditInfo

C:/Users/rebec/Documents/it_project/Code/crm/src/components/Edit/EditInfo.js:62

```
59 |   var [editInfoStatus, setEditInfoStatus] = useState();
60 |   var [editPwStatus, setEditPwStatus] = useState();
61 |
> 62 |   const oldUsername = decode.username;
    |   ^
64 |   const submitInformation = async (e) => {
65 |     e.preventDefault();
```

saveToken

C:/Users/rebec/Documents/it_project/Code/crm/src/components/App/userToken.js:14

```
11 |
12 |   const saveToken = userToken => {
13 |     localStorage.setItem('token', JSON.stringify(userToken));
> 14 |     setToken(userToken.token);
    |     ^
15 |   };
16 |
17 |   return {
```

submitPassword

C:/Users/rebec/Documents/it_project/Code/crm/src/components/Edit/EditInfo.js:101

```
98 |     setEditPwStatus({ msg: "Passwords did not match.", key: Math.random(), severity: "error" });
99 |   }
100 |   else {
> 101 |     setToken(res);
    |     ^
102 |     setEditPwStatus({ msg: "Password successfully changed.", key: Math.random(), severity: "success" });
103 |   }
104 | }
```

This screen is visible only in development. It will not appear if the app crashes in production.
Open your browser's developer console to further inspect this error. Click the "X" or hit ESC to dismiss this message.

Expected behaviour

- Password should successfully change with a popup and page doesn't change.
